Lab23: Census 2000 Population Data

- Read the names and populations from text files.
- Convert the populations from strings to integers.
- Identify the min and max population values.
-
- Decide on a min and max font size.
- Proportionally assign font sizes based on population.
- Print out each region's name and its font size.
-
- Two files...
 1. Postal abbreviation and population.
 2. Postal abbreviation and name.
-
- For the first split by whitespace, no argument.
- For the second split by newline '\n' because of names with more than one word.
-
- Use a hash table (dictionary, associative array) to merge the data.
-

Official Use Only
